Freelance Flutter Developer,
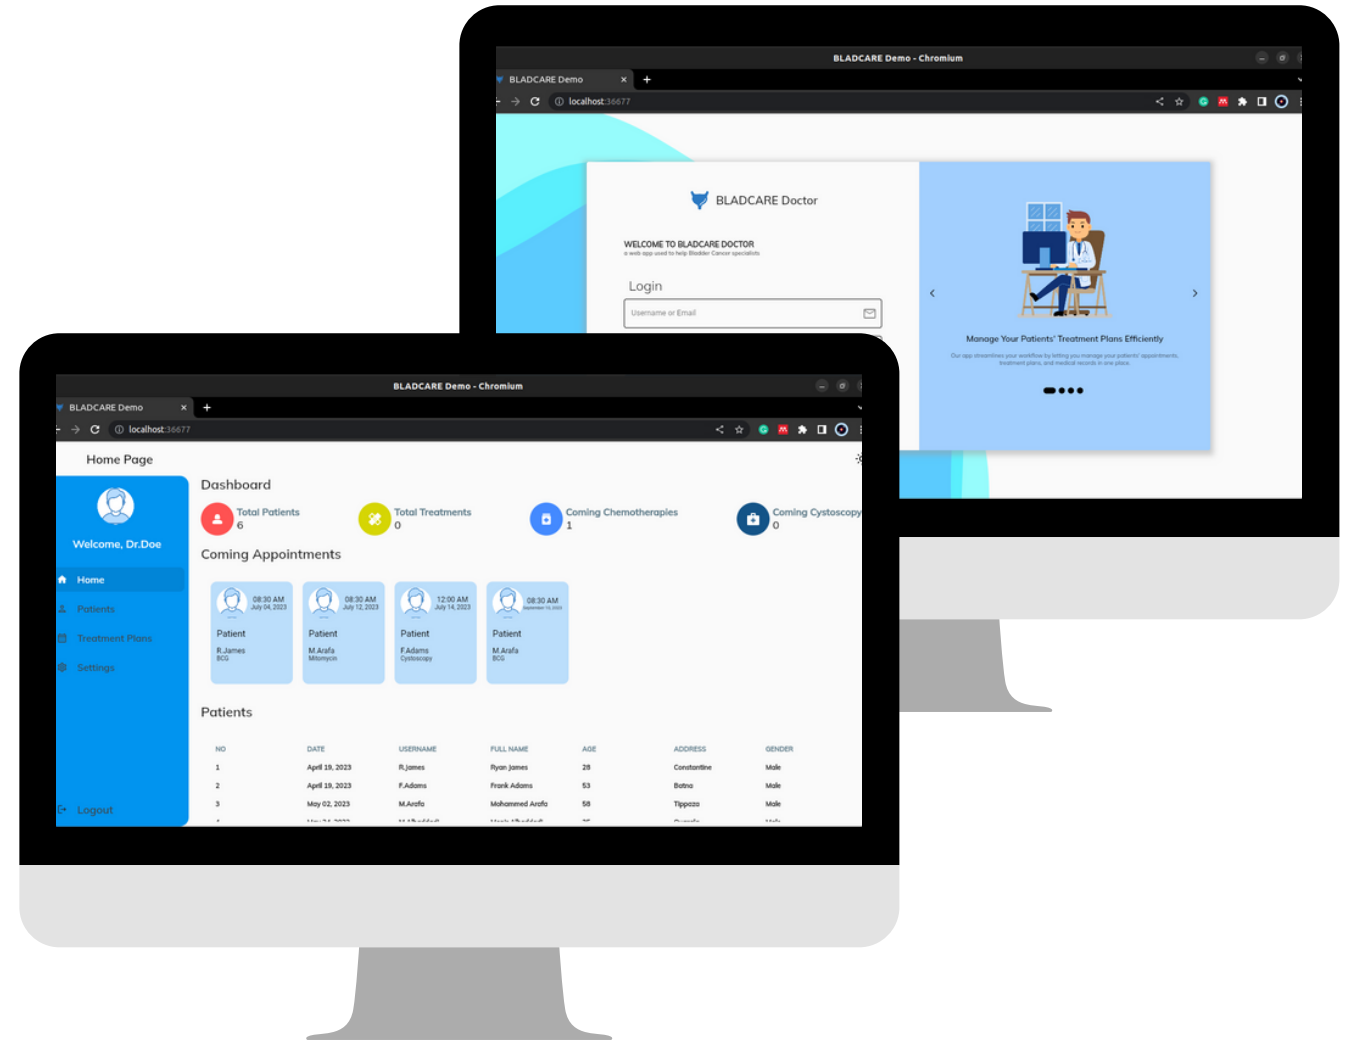

09/2022-Present

Skills

- Flutter Development
- RESTful APIs
- State Management
- Problem Solving
- Project Management
- Clean Code & Design Pattern
- Back-end Development

Projects

BladCare Web

A robust web application with a Node.js Back-end designed to streamline the patient management process for medical professionals.
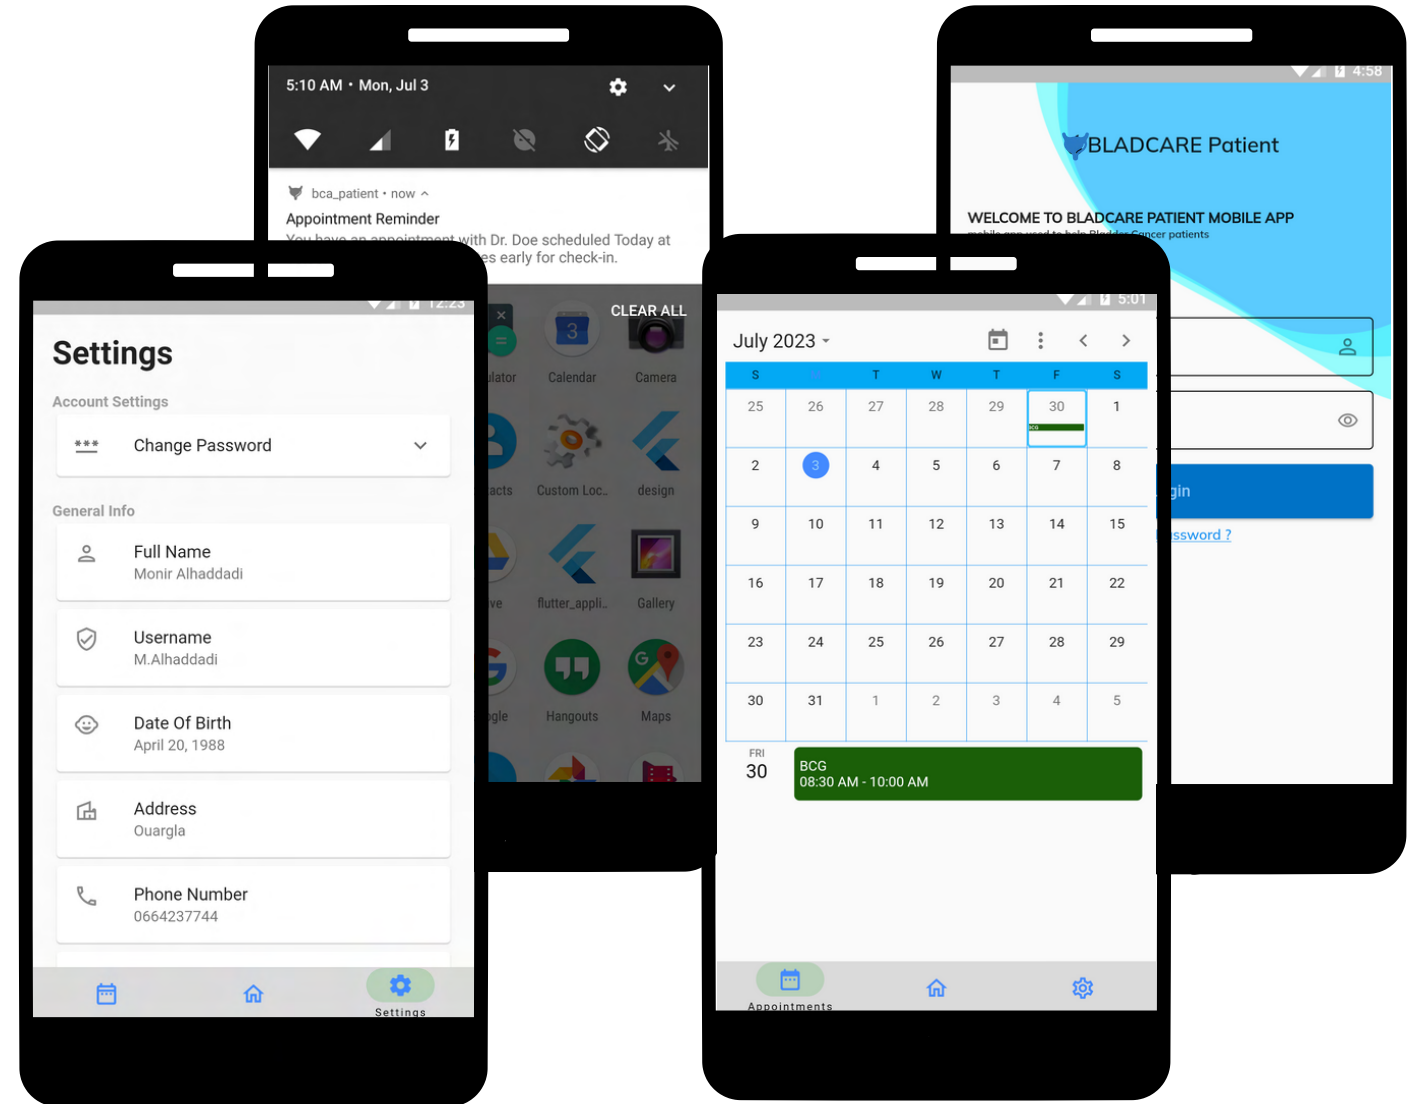

The web app enables doctors to efficiently manage patient appointments, maintain detailed medical profiles, and securely upload medical scans to a cloud storage service like Cloudinary.

Integrated advanced features such as user authentication, data storage, multilingual and multi themes. GitHub

BladCare Mobile

Complementing the web app, I created a user-friendly mobile application for patients. This app provides patients with a convenient platform to view their appointments and receive timely notifications about upcoming appointments..

NotaFlow

Designed and developed NotaFlow, a versatile note-taking application. This application empowers users to create, view, edit, and delete notes, NotaFlow uses a local NoSQL database, specifically Hive, to ensure efficient and secure storage of users' notes. GitHub
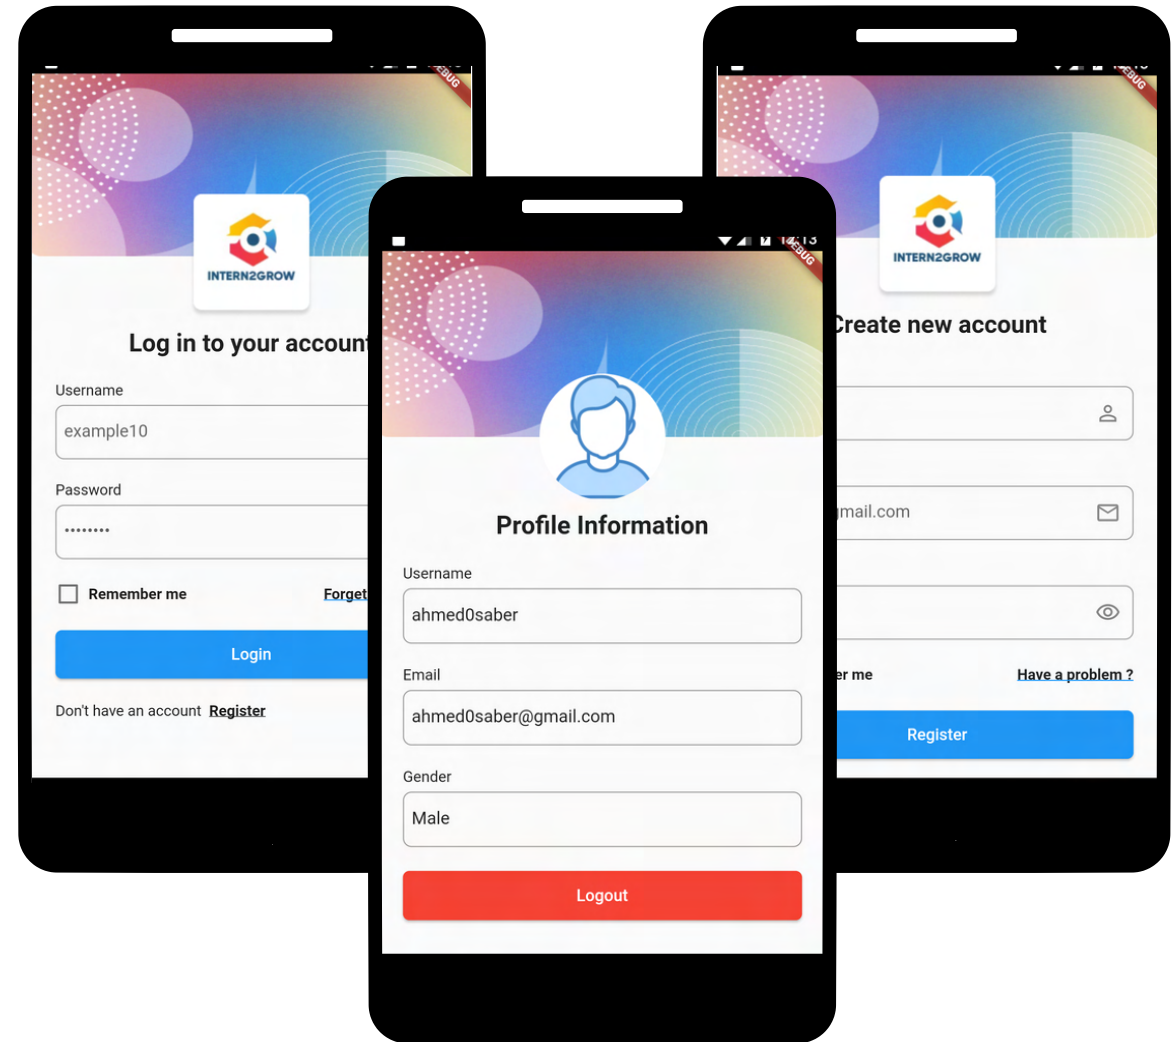

WeatherHost

Designed and built WeatherHost, an intuitive weather application. WeatherHost offers users up-to-date weather information, helping them make informed decisions about their day.

Inter2GrowAuth

Developed simple authentication
screens for the Inter2Grow
Project. GitHub

ChatApp

Created a Chatting App with
authentication and messaging
features. This app was built using
Firebase, highlighting expertise
in real-time communication and
secure user authentication.

BookWise

Currently working on BookWise, a user-friendly book-viewing application. This app seamlessly integrates with the Google API, allowing readers to access a vast library of books. GitHub

I create dynamic and user-centric Flutter Apps with expertise in Back-end development using Node.js.
